

Recycle – it's vital!

When visiting or staying on the Island please follow the simple tips below to help us recycle more efficiently:

- Please separate your recyclables and put them in the yellow-top bins.
- DO NOT tie up recycling in plastic bags – empty straight into yellow-top bins
- All plastic containers, cardboard, paper, glass (even broken glass) and aluminium go in the recycling bin
- Tip out any liquids and remove lids before putting containers in the recycling bins
- All food, contaminated wrappers, polystyrene and plastic wrap, goes into the red-top bins
- Rubbish in the red-top bins is composted – that is why it is important to separate all recycling out first as recyclable plastic or glass is a contaminate and makes it difficult create usable compost
- Please don't dispose to batteries in the rubbish bin – they are hazardous waste and can be disposed of in the containers at the Wellness Centre and the Main staff Office
